PASSION for PRIME

Wagyu Bulls • Females • Frozen Genetics

Springfield, Missouri
Springfield Livestock Marketing Center

Follow Your Passion, Passion For Prime

June 10th, 2017
SALE LOCATION
The sale will be held at: Springfield Livestock Marketing Center
6821 W Independence Dr., Springfield, MO 65802

ACCOMODATIONS
The Headquarter hotel for the sale will be: Double Tree by Hilton
2431 N Glenstone Ave, - Springfield, Missouri 65803
417-831-3131

TRANSPORTATION
The Springfield-Branson national airport is located within 17 minutes from the sale site. The Kansas City International Airport is located 3 hours from the sale site. Both airports are serviced by most major airlines.

HERD HEALTH
• All cattle are up to date on vaccines and general herd health.
• Any tests and/or health paper expenses needed for transportation will be the buyer’s responsibility. The seller will assist the buyer in arranging this process with their veterinarian of choice.

GENETIC CONDITIONS
• All cattle and/or genetics selling in this sale are free of any and all known genetic conditions unless otherwise stated within each individual lot’s footnotes within this catalog. The % listed in this catalog is probability within the pedigree – if tested free, results will be available on the supplement sheet.

TERM & CONDITIONS
• All sales are final and must be paid before shipment can be made. Absentee buyers & internet buyer payments can be wired to the sale management’s custodial account before cattle are released to the buyer.
• Semen/embryos will be released to the buyer once payment has been made. Shipping arrangements and costs for semen & embryos are the buyer’s responsibility. Semen and Embryos sells per unit/embryo times the number within the package.
• Conception rate of all embryos is not guaranteed unless individual sellers determine so – this information will be found within each individual lot’s footnotes within this catalog.
• Shipping expenses of any and all live animals will be the buyer’s responsibility - seller and buyer will work together to establish all shipping arrangements. All lots become the buyer’s risk once purchased. After purchase, all costs are the buyer’s responsibility. The recommended hauler for live lots is Lathrop Trucking: 847-426-5009
• All costs for exporting lots are the buyer’s responsibility and expense
• All pick/choice lots of live animals will be between the buyer and consignor; this includes the date to make a decision, all shipping arrangements and transfer fees/processing.
• Any errors, updates, or changes in information contained in this catalog will be announced from the auction block and included in a supplement sheet on sale day. Announcements from the block take precedence over the catalog and any prior released information.
• Sale management is not responsible for any embryo, conception and/or pregnancy guarantees. Any discrepancies are between the buyer and the seller.

LIVESTOCK MORTALITY INSURANCE
• Mortality insurance on your purchases can be obtained from the Sale Management through American Livestock Insurance Co. at time of settlement.

LIABILITY
• All persons attending the sale and related functions do so at their own risk. James Danekas & Associates, Inc., its employees, all sale representatives and sale consignors assume no liability, legal or otherwise, for any accidents, damages, or injuries that may occur.

INTERNET/ABSENTEE BIDDING
Real-time bidding for the “Pasion for Prime” sale is available via the internet through www.liveauctions.tv Live audio and live video will allow registered buyers to bid on the animals just as they were present the sale day. A buyer account must be created prior to the sale. Please visit http://www.liveauctions.tv to create an account and request a bidder number. Instructions are available to walk you through the account set up process. If you cannot attend the sale because of weather, distance or business conflicts, please use LiveAuctions.tv. Buyers who would like to bid via internet must register with LiveAuctions.tv prior to the start of the sale. If you have questions, e-mail: Brad@LiveAuctions.tv or call 816-392-9241.
Dear Wagyu Breeders & Enthusiasts,

It is with great honor to present this offering of Wagyu genetics! Not only is the Wagyu breed growing within the beef industry, it is making waves in our mainstream society as people try the product and are recognizing the added value and quality that it has. As we see this demand grow, the breeding stock must as well in order to meet the needs of the market. We are seeing Wagyu popping up all over the country, whether they are entirely new to the cattle industry or converts from another breed; the breed is expanding.

This offering includes some of the best of the breed and many from programs that have been involved since the birth of Wagyu in the U.S. With this, you can rest assured that you will be adding top quality Wagyu genetics to your program or if you are just starting out, you will have some of the best building blocks to base your herd from. From herdsire prospects, replacements heifers, donors, embryos and semen; you’ll get your pick of sought after Wagyu genetics, some of which are original lineage of the breed. This is an opportunity to take advantage of especially at a time of which the Wagyu breed is excelling in popularity amongst the entire beef industry.

Thank you for your interest in the Passion for Prime offering. If you have any questions or need any assistance regarding this sale, me and my entire staff will be more than happy to assist you.

Sincerely,
Mercedes Danekas-Lohse
James Danekas & Associates Inc.

  - Color: 100% Red  
  - Sells Open  
  - SCD AA Tenderness 3  
  - The Sire Henshin is large framed, easy going and one of the best bulls among his contemporaries with exceptional EDP’s; lots of growth and great breedplan figures. He is in the top 5% of the Australian breed plan for 200 and 600 day weight and top 10% for the 400 day weight. His bloodlines (that trace back to Kajikari, Hikari and Big Al) are packed with the breeds best red genetics. Dam, Tamayuko, is a nice female; very correct and one of the biggest framed cows in the Bald Ridge Wagyu program.

  - SCD AA Tenderness 5  
  - A powerful pairing of BMR 777 and BAR R Nakagishiro 56T Daughter of the prolific BMR 777 whose embryos have recently sold for $1000 each. Lot 2 is a very friendly heifer with great genetics. Her sire, 56T, is known to improve growth and carries rare and valuable genetics as he was the only bull out of Nakagishi 5 cow, one of World K’s last imports. Her dam has been a donor at Buck Mountain and you’ll find her and her genetics throughout the sale. Lot 2 has an AA SCD, is young and has a wonderful future ahead of her!

  - Color: 50% Black - 50% Red  
  - Sells Open  
  - This cow is open ready to go to work. Very impressive stats for this cow. Her ultrasound data came back as high choice, nice for only a yearling heifer. Lot 3 produced a very powerful bull calf and was a very powerful milk producer for her first calf. Her sire was a 2016 “Wagyu - Champion of the World” qualifier and has a very impressive phenotype. Red Galaxy has a pedigree stacked with all the best in red genetics and also has an AA SCD.

Here we have a valuable young female ready to start her career. The paternal grandsire here is Itomichi 1/2, who is known to have high grade cows that consistently produce large quality beef from the Dai Ni Kinto line in his pedigree. Lot 8's dam is by the famous Sanjirou. Sanjirou is one of the most influential sires from the Tajima line to leave Japan. He is proven to have great meat quality with a large ribeye, thick rib and high yields. In the 2006 U.S. Wagyu Sire Summary, Sanjirou ranked third for marbling. Lot 8 is combination of superb genetics that will ensure both growth and carcass quality.

Lot 9 is sired by a Mitsuhiokokura son. Mitsuhiokokura is a growthy bull and also a bull known to be one of the thickest in the entire Wagyu breed. This bull is also said to improve milking ability within his daughters. Lot 9's dam is sired by Kimifuku 3 and has been an amazing producer. A son of TF 713, TBR Itoshigefuku 2 9061W, is a superb individual and AI sire.
**FEMALES**

**CC MS YOMIURI 4838**

- **Lot 10** - Bull calf (7047) born 5/04/17, 62lbs. sired by CC Ito Doi
- **Sells Open**
- The paternal grandsire here, J2351, was sired by Dai 20 Hirashige J287. His maternal great-grandsire is the distinguished Tajiri-line Tayasudoji. Hirashigeta-yasu J2351’s Kedaka lineage shows strong propensity for growth and balance with a larger frame. An official Japanese progeny test showed that at least 80 percent of his steers would gain A5 grade, the highest given to carcasses in Japan. To add even more value, we find Sanjirou as Lot 10’s maternal grandsire. Sanjirou is the most influential sires of the Tajima line, having great meat quality, large ribeye area, thick rib and high yields. In the 2006 U.S. Wagyu Sire Summary, Sanjirou ranks third highest in marbling. Don’t miss this power packed individual!

**CC MS ITOSURU DOI 4820**

- **Lot 11** - Heifer calf (6079) born 12-24-16 58lbs. sired by World K’s Michifuku
- **Sells Open**
- This female’s sire, Itozuru Doi, brings to the table an extremely large frame with a mature weight of 2,420 lbs while passing on great maternal traits onto his progeny which adds milking ability. Along with both maternal traits and high performance, Itozuru Doi also is one of the best marbling bulls from the Fujiyoshi line. the bottom side of this pedigree comes from the UKB program in Texas and carries great red gentics. She has a heifer calf at side making this a two for one package!

**CC MS ITOZURU OLI 4811**

- **Lot 13’s sire, Shigeshigetani,** has some of the most powerful genetics in the Wagyu breed. He has Yasumi Doi as well as Yasu-tanidoi bloodlines but he carries the Kumanami strain as well. The Kuma-nami family is known for its extremely potent marbling genes. Shigeshigetani is a half brother to the famous bull Sanjirou. Note: The World K Group reports 3800 F1s were fed 540 days ADG 2.156. 90% graded 9+ on the Australian scale, meaning 3 full grades above USDA highest grade of prime. The remaining 10% graded 7-9 on the Australian scale and this would be prime to prime + on the USDA scale. Her maternal grandsire, tozuru Doi, brings to the table an extremely large frame with a mature weight of 2,420 lbs while passing on great maternal traits onto his progeny which adds milking ability. with a bull calf at side, Lot 13 is the complete package.

- **Hiroto** is an exceptional fullblood Wagyu red bull sired by the top Australian bull Seisakushu (bred by the famous Symo Cattle Company). Hiroto traces back two times to the Dam, Akiko, who's sire is Namimaru. Also in this powerful lineup is Tamamaru. This makes JR-Hiroto an outcross to most red Wagyu around the world. With Akiko found twice in his dam's pedigree, you know there is much value to his genetic makeup. He is the largest and fastest growing in his contemporary group and also best known for finishing out grass fed. We find Haruki 2 on the bottom side of her pedigree. Haruki 2 is considered to be one of the best foundation sires for breeding females with excellent frame scores & milk. His dam has outstanding EBV for marble score and average carcass weight. Lot 16 is royally bred with many successful years ahead of her.

- Fullblood • Color: 100% Black • Sells Open • SCD VA Tenderness 6 • Halter Broke
- Here is an open heifer with some added look. She is sired by Itomichi ½, who is known to have high grade cows that consistently produce large quality beef from the Dai Ni Kinto line in his pedigree, and out of a Sanjirou daughter that has been very successful in our donor pen. This heifer profiles nicely with a feminine front, bold middle, with more than adequate bone and muscle thrown in. Watch her coming and going and she holds up just as well as on the profile. Add in what she has to offer through her pedigree, and this is a very interesting female.

- Sells Open
- The Passion for Prime sale wants to display the best in wagyu genetics. With this heifer you are seeing just that. Wagyu100 brings you this one of a kind Ruesaw over Tamamaru Breeding. The Inbreeding coefficient is 0%. That is correct 100% Red Wagyu 0% inbreeding coefficient. Rueshaw semen sales are over $5,000 per straw. Finding it is one thing finding someone to sale it to you is another. Rue-shaw was the 1975 Japanese National Champion Bull. He was one of the first two original bulls to ever leave Japan in 1976. The dam in this mating is a daughter of Tamamaru. Many pedigrees have a trace of Rueshaw, this is your chance to own an actual daughter of Rueshaw. This heifer will stay at Wagyu100 until 4 months of age at no cost.

- Fullblood
- Sire: 100% Black Dam: 100% Black
- Sells Open
- Wagyu100 is producing foundation stock from the top bulls of all time and with this mating we are not holding back. The sire Kenhanafuji was one of the most promising young bulls Japan had ever produced when he was purchased by U.S. investors in the early 90's and exported to America. Upon arriving in America a Japanese investor purchased Kenhanafuji for a reported $150,000, and took him back to Japan. With a limited supply of semen available offspring of Kenhanafuji has been very limited. Semen on Kenhanafuji has sold recently for over $3,000 per straw. The dam of this bull is Nanashi. She is a daughter of the great Itozuru Doi 151. Itozuru Doi 151 semen is limited to only a handful of known straws left in existence. The last recorded sale of Itozuru Doi 151 semen sold for $9,000 per straw. Itozuru Doi 151 beat Michifuku in every statistical category of comparison in fullblood wagyu carcasses. By the time his progeny were tested and his value was discovered, Itozuru Doi TF151 was deceased, leaving a very limited supply of semen. The sire of the dam to Nanashi is the great Sanjirou SCD AA-7. Wagyu100 is one of the first to offer this mating. This heifer will be held until 4 months of age at Wagyu100 at no charge.

- Sells Open
- Wagyu100 is bringing back the foundation bulls with this mating. Beijiro is a bull that has virtually no semen available and what is available sells for over $2,500 a straw. This bull is a son of Okutani one of the original females imported with Suzutani, he is sired by Haruki 2 who is starting to become one of the top trait leaders in the breed. He is full brother to Genjirou and full brother to Fujiko the first Wagyu born in the United States. On the dam side we have CHR MS Mitsuhikokura 521 a daughter to Mitsuhikokura 149. Mitsuhikokura 149 is known for growth and milk and as the thickest bull in Wagyu. On the bottom of CHR MS Mitsuhikokura 521 pedigree you find Suzutaka 2 a dam sired by another great foundation bull Takazakura. Takazakura is sired by Takei who is a son of the legendary Japanese sire Yasufuku J930. The dam of Suzutaka is Suzutani. Suzutani is without question the most influential dam in the Wagyu breed. Suzutani was the dam of Sanjirou, and Shigishigitani.

- TWA Onesan
- HB Big AL 502
- Coates Kaze
- TWA Mutsunami

**Tenderness:** SCD AA

**Description:**
- Fullblood
- Color: 100% Red
- A powerful young bull is ready to go to work. With great names like Hikari and Akiko in this bull's pedigree this animal has proven genetics. His sire's name translates to "Creator". His sire Hikari and grand-sire Shigemaru. He weighed 636 kg (1 402 lb) at 4 years of age and tested to be free from the five known recessive conditions. His dam is by the famous Big Al. is the direct product of the best bull and cow of the breed. His sire Dai 10 Mitsumaru, also the sire of original imports Hikari, Kaedemaru, and Kunisakae, was considered the greatest bull in the world by Japan at the time when Al and Marie Woods sent world class cattlemen Yukio Kurosawatsu and Bruce Hemmingsen to procure a shipment of "Japanese Browns" to America in 1993. Akiko was one of the top cows in Japan and it took considerable wrangling to buy out her existing contract and bring her to the states. Since there was no way to get Dai 10 out of country, the decision was made to breed Akiko to him before she started quarantine in Japan. The result of that calf, was Big Al. A package of royal bloodlines here!

#### JCN OSHI D9

**Lot 36**

- JR-Keyoshi
- MS Sigenami

**Tenderness:** SCD VA

**Description:**
- Fullblood
- Color: 50% Black - 50% Red
- This red/black combo is sired by JR-Hiroto who is an exceptional fullblood Wagyu red bull sired by the top Australian bull Seisakushu (bred by the famous Symo Cattle Company). Hiroto traces back two times to the Dam, Akiko, who's sire is Namimaru. Also in this powerful lineup is Tamamaru. This makes JR-Hiroto an outcross to most red Wagyu around the world. With Akiko found twice in his dam's pedigree, you know there is much value to his genetic makeup. He is the largest and fastest growing in his contemporary group and also best known for finishing out grass fed. Lot 36's dam is by Z278, who has all three of the Westholme original import bulls in his pedigree. He is a son of Hirashigetayasu 001 out of a cow who is a daughter of Kitateruyasudoi 003 and his great grandsire is Itomoritaka 002. Z278 is a great balance of Kedaka Fujiyoshi and Tajima and is a very thick and correct bull. His daughters have good udders and his calves are born easily even though they are a little larger than the average Wagyu calves. Lot 36 is a young herdsire prospect with all the makings of a great one.

- This yearling has been a standout in his contemporary group from birth. This young bull is sired by Stonyrun ID 151 Ichiro 1, which is an Itozuru Doi son that descends from the Suzatani line on the bottom side of his pedigree. Ichutani 10D is out of our CHR Ms Suzatani 262T cow, which is a maternal granddaughter of Suzatani. This means that 10D has Suzatani twice in his three-generation pedigree. He backs his quality pedigree with a strong genomic profile. And, with his notable WW and YW he shows strong performance traits of his own. This young bull has all of the pieces needed to sire calves of true quality that will perform as replacements, bulls and on the rail.

- This bull has a lot to offer. His pedigree is stacked full of the great sires, including Yasafuku Jr, Z278 and Michifuku. In addition, he stems from the Suzutani line on the bottom side of his pedigree. His genomic profile is just as impressive as the list of great cattle in his lineage. Perhaps the most striking thing about this bull is just how well he is put together. He is rugged in his design from front to back, being smooth fronted, correct in all of his angles, deep ribbed, and all while standing on a large correct foot. Add his powerful musculature and thick quarter to his large scrotal circumference, and this is a bull that is ready to go to work and add value to your herd.

- **Fullblood**
- **Color:** 100% Red
- **SCD AA**

This Bull’s sire is the famed son of Big Al and Dai 8 Marunami. His semen is rare and he is considered to be one of the best producers of early maturing cattle that do well on pasture. On the Dams side you get a cow bred by the well known genetics of Barbara Thompson in Australia from her top Maternal line. In addition to the cows maternal line she is also conformationally correct and produced The winner of “Grand Champion Fullblood Red Heifer” at the Houston show this year. These facts are a testament to the potential this deep red bull has to produce very correct, high growth and maternal offspring. He is AA and free of all genetic defects.

**Lot 44**

- IWG RUESHAW 74Z
- GABNI RUBI
- HB BIG AL 502
- COATES TSUKI
- TWA MUSUME

- **Fullblood**
- **Color:** 100% Red

The sire of this bull is 74Z. Rueshaw 74Z has proven to produce heavy muscled calves with above average growth and good marbling. 74Zs sire was the 1975 Japanese National Champion and was the only national champion to leave Japan. Just like his sire, Lot 44 is thick throughout and has the performance to compete amongst the best. His dam brings even more value to the table as she is sired by Big Al, one of the best bulls to date in red genetics. This bull is a great candidate; he’ll pass on amazing cacaq style quality while being that front pasture kind.

**Lot 45**

**SCHARDT - UMEMARU 17**

Wagyu100 brings you this one of a kind Rueshaw over Big Al Daughter Breeding. The inbreeding coefficient is 0%. That is correct 100% Red Wagyu 0% inbreeding coefficient. Rueshaw semen sales for over $5,000 per straw. Finding it is one thing finding someone to sale it to you is another. Rueshaw was the 1975 Japanese National Champion Bull. He was one of the first two original bulls to ever leave Japan in 1976. The dam in this mating is a daughter of HB Big Al. Big Al was the first Akaushi calf born outside of Japan. Big Al is the pride of Heartbrand company and to this day sits in the lobby of their corporate headquarters. Daughters of Big Al are limited, with Big Al semen getting less and less available and currently costing over $800 per straw. Rueshaw sons in general are very high in demand, throw in a daughter of Big Al as the dam and you have something special. Wagyu100 reserves 10% interest in semen from this bull for use limited to our breeding program. Bull will be held until 4 months of age at Wagyu100 at no charge. Free of all genetic disorders.

- **JVP MS HOMARE J 30E**

- **Fullblood**
- **Sire:** 100% Black Dam: 100% Red

In this breeding Wagyu100 is bringing back the rare hard to find foundation bulls. The sire in this mating Shigefuku 005 is a bull bred from within the main Kedaka lines. He exhibits higher growth rates, body volume and desirable coat type. Shigefuku 005 weighed in at 1,735 lbs. at 23 months of age. There are no known reports of his full mature weight since he never left Japan but realistic estimates are 2,400 lbs. Shigefuku 005 was a bull that never left Japan, just his semen. Therefore, the supply of semen is almost nonexistent selling for $2,500 plus per straw. The dam of this breeding CHR MS Michifuku 2 is the daughter of Michifuku SCD Score of AA-5. Michifuku is thought to be the best carcass bull ever to leave Japan. Even with smaller framed offspring, his progeny’s carcass characteristics are superb. Michifuku was formerly the number one marbling bull in the U.S. Wagyu Sire Summary. On the bottom of CHR MS Michifuku 2’s pedigree you find Fukutsuru 068, the number one ranked bull in the U.S. Sire Summary. Fukutsuru 068 has an SCD Score of AA-8.

He also possesses seven of the eight Pfizer high marbling genes, five of the six tenderness genes and seven of the eight feed efficiency genes. Michiyoshi is the number 5 marbling bull and who’s ribeye EPD is +.58. His sire, Sanjirou, is a linebred Yasumi Doi J10328 bull. Yasumi Doi J10328 sired Yasutaniidoi J472 and grandisired both Fukutsuru 068 and Yasufuku 930. Sanjirou is out of the prominent Japanese cow Suzutani, who represents one of the most potent bloodlines in Japan. Her great-grandsire, Yasumi Doi J10328, is widely known for his ability to produce excellent meat quality and size. Suzutani’s sire was Tanishige 1526, whose progeny test results demonstrate that he has heritable traits with a BMS score +3.1 (above the national average of +2.1) and a yield grade of 72.7 percent. Offspring will carry a copy of the High Marbling Exon 5 genes Type B or C. Michiyoshi semen is not available anymore so this is a wonderful opportunity and to mix Jiro into it makes this package even sweeter.

**BAR R ARIMURA 30B X MFC MS ITOMORITAKA 540C**

Owned by: High Hopes Ranch Bloomer WI

- Purebred • Sire: PB17438-Black Dam: FB21102 - Black
- 6 Embryos • Conventional collection • Exportable
- Stored at Buchner ET Services New Auburn, WI - shipping is the buyer's responsibility
- Sired by Bar R Arimura 30B, the first homozygous polled purebred Wagyu bull registered by Bar R Cattle Co. Bar R Arimura is grandsired by Shigeshigetani 30T who ranks #1 for ribeye, #1 for carcass weight and #8 for marbling. Bar R Arimura’s dam, Bar R 5U, also has a great pedigree including Takazakura, Michifuku and JVP Fukutsuru 068; she sold at an auction last year for $34,000! The dam of the embryos is a fullblood daughter of MFC Itomoritaka 0-41 who has sired class winners at the National Western Stock Show in Denver. She is a great combination of Itomoritaka, Michifuku, JVP Kikuyasu 400 and Sanjirou! The offspring from these embryos will be polled and will have over 99.2% Wagyu blood. Don’t miss out on this opportunity to bring some of the next great polled Wagyu genetics to your ranch! Embryos are exportable and free of all genetic disorders.

**“BRADY” 2627A X LAG B1002P**

Owned by: Legendary Akaushi Genetics Kady TX

- Fullblood • Sire: AF52168 – Red Dam: FB25318 - Red
- 3 Embryos
- Stored at Elgin Breeding Services Elgin, TX - shipping is the buyer's responsibility
- B1002P is another one of the Big Al by Fuyuko girls in our donor program, we apologize for not having her picture but can confirm her conformation is much like her sisters B0589P & B1815P. The old girl boast a tenderness rating of 5 and an SCD of AA. She is 13 years old, has a perfect calving record and is still one of our top embryo producers. In Legendary’s view, the mating of B1002P with Brady was a continuation of a strategy to breed Rueshaw genetics into 1994 foundation cows to determine how his genetics impact carcass characteristics. So far he has not disappointed. Brady is currently registered with the American Akaushi Association and will be registered in the American Wagyu Association.

- **Sire:** FB14234 – Black Dam: FB19542 - Black
- **5 Embryos - conventionally collected - grade 1**
- **Stored at Ashby Embryos Rockingham, VA - shipping is the buyer's responsibility**
- **FFX Malachite came from the downsized Empire State Farm program where Dr. Sherwood described the Sutton Creek bred daughter of 28X as "phenotypically spectacular". 28X roots start with Fujiko and work up to possibly the best growth, carcass, and marbling genetics exported from Japan; Itomichi, Itozuru Doi 151, & Itoshigenami. Malachite's sire, Hanshoku, a more muscular bull than his full brother Shigeshigetani brings the Suzatani and Haruki II genes many Wagyu breeders desire. FFX Malachite has great strength, is a balanced Tajima & Ito cow that is gentle and has been a great mother with ample milk. She has averaged 26 embryos per flush and we expect that fertility and mothering ability to carry down to her offspring. We looked for sires heavy in Kedaka influence to match with Malachite, similar to what we observed while visiting cow/calf farms in Nagasaki Prefecture, Japan, home of the 2012 Zenkyo "Prime Minister Award" (Grand Champion) Carcass. After much research and consultation, we are proud to offer embryos from two of our flushes. The 1st sire needs little introduction, (FB14234) LMR RMW Tomoritaka “Rocky”, bred by Lone Mountain and now owned by Rocky Mountain Wagyu. Rocky has more registered offspring than any other bull born in the last 10 years. His breeding is similar to the top bulls used in Southern Japan (40% Kedaka, 35% Ito, and 25% Tajima) which produce long, thick, and deep cattle. Rocky's dam 767T, the matriarch of an incredible cow family is a breeding of Sanjirou and Nakazakura, mixing Tajima influence with the structural correctness of Nakazakura. She is consistently passing on this elite structure being the Dam and Grand Dam of numerous Champions at the livestock shows in Denver, Louisville & Houston. Rocky, based on his pedigree and Australian EBV's, should bring trait leading ribeye, growth, milk, carcass yield, and marbling fineness to his offspring. Calves produced from this pairing will be: 40% Tajima, 35% Ito, & 25% Kedaka. All offspring will be SCD AA and recessive free by pedigree.

**UKB MR YASUUSHIGEFUKU X FFX MALACHITE**

**OWNED BY: WAGYU SHIMIZU CARSON VA**

**005 SHIGEFUKU 13M**

**UKB MR YASUUSHIGEFUKU**

**FFX MALACHITE**

**HW DAI NAMI DOI 28X**

- **Sire:** FB11972 – Black Dam: FB19542 - Black
- **5 Embryos - conventionally collected - grade 1**
- **Stored at Ashby Embryos Rockingham, VA - shipping is the buyer's responsibility**
- **The sire of the 2nd flushing, (FB11972) UKB Mr. Yasushigefuku comes from the unparalleled UKB program and is a producer of top performance and phenotypically consistent females. Dai 20 Hirashige, a Grand Sire and Great Grand Sire on opposite sides of the pedigree is considered the most influential descendant of Kedaka and is known to pass on great growth and deep bodies to his offspring. Yasushigeefuku's genetic breakdown is also closer in line to the bulls in Southern Japan (50% Kedaka, 25% Ito, & 25% Tajima) and should produce long, deep, thick offspring, and great mothers. ½ of the straws used in this flush were Female Sorted semen increasing the probability of having heifer offspring. Calves produced from this pairing will be 40% Tajima, 32% Ito, & 28% Kedaka. I expect them to have a SCD AA score and are recessive free by pedigree.**

- Lot 75 is a 100% Tajima blood bull and the heaviest Tajima bull imported. He produces top carcasses and big rib eyed cattle. He has sired some outstanding females. JVP Kikuyasu 400 blood is found in a number of top producing female bloodlines and should not be underestimated as a stud sire, especially in breeders wishing to get frame score into females with Tajima blood.
A limited amount of semen was imported. "Westholme" bull to use but, he is more important than all other original "Westholme" bulls combined for improving Wagyu functionality and structure. Only rate, calm dispositions, and show me the traits I look for as indicators of improved milking ability. In my opinion, he is not only the most important original I am aware of, I would not put any other beef sire ahead of Shigefuku for bone quality and bone structure. Shigefuku offspring also have excellent growth very consistent. Most are among the very most correct Wagyu I have studied. Beyond this I will even say after evaluating thousands of cattle, of all the sires offspring in the US that I have not had the opportunity to study. I have also analyzed all those I know of yet to be registered. The Shigefuku progeny are and Kedaka genetics. Shigefuku was a large impressive bull with strong growth genetics; he weighed 1735# at 23 months. There are no registered Shigefuku sire among imported Wagyu bulls available to US breeders. Shigefuku is 3/4 Kedaka and 1/4 Tottori, and is the only bull available in the US with 100% Tottori on in Japan, sought out, found, and began to use a very special Wagyu bull. A line bred bull that is predictable in his ability to pass onto his offspring genetics to improve Wagyu, such as better skeletal quality and better skin and hair quality. Recently a few US Wagyu breeders more aware of the real breeding going on in Japan, sought out, found, and began to use a very special Wagyu bull. A line bred bull that is predictable in his ability to pass onto his offspring genetics vitally needed for the long term improvement of Wagyu in the US. That bull is Shigefuku J1822 (also known as Westholme 005).Shigefuku J1822 is a unique sire among imported Wagyu bulls available to US breeders. Shigefuku is 3/4 Kedaka and 1/4 Tottori, and is the only bull available in the US with 100% Tottori and Kedaka genetics. Shigefuku was a large impressive bull with strong growth genetics; he weighed 1735# at 23 months. There are no registered Shigefuku offspring in the US that I have not had the opportunity to study. I have also analyzed all those I know of yet to be registered. The Shigefuku progeny are very consistent. Most are among the very most correct Wagyu I have studied. Beyond this I will even say after evaluating thousands of cattle, of all the sires I am aware of, I would not put any other beef sire ahead of Shigefuku for bone quality and bone structure. Shigefuku offspring also have excellent growth rate, calm dispositions, and show me the traits I look for as indicators of improved milking ability. In my opinion, he is not only the most important original “Westholme” bull to use but, he is more important than all other original “Westholme” bulls combined for improving Wagyu functionality and structure. Only a limited amount of semen was imported. Written by: Eldon Clawson

### Shigefuku J1822
- **Lot 76**
- **DOB:** 05/30/1986
- **TATF:** ETJ 005
- **Owned by:** Crescent Harbor Ranch Oak Harbor WA

- **Fullblood**
- **Color:** 100% Black
- **5 Units**
- **Stored at Hawkeye Breeders Adel IA - shipping is the buyer’s responsibility**

In Japan, a recent report shows the Kedaka strain’s influence in current Wagyu produced is over 60%. Further, the influence of Kedaka in Black Wagyu now being produced is over three times that of all Tajima strains and sub strains combined. Careful record keeping and extensive testing and analysis have led their direction and progress. Japanese breeders have made progress in functionality and performance as well as carcass improvement. Many have heard that Kedaka progeny have good growth and improve milking ability in Wagyu. Less well known are the other qualities for which the Japanese use Kedaka genetics to improve Wagyu, such as better skeletal quality and better skin and hair quality. Recently a few US Wagyu breeders more aware of the real breeding going on in Japan, sought out, found, and began to use a very special Wagyu bull. A line bred bull that is predictable in his ability to pass onto his offspring genetics vitally needed for the long term improvement of Wagyu in the US. ### MT Fuji
- **Lot 77**
- **DOB:** 01/08/1974
- **TATE:** 74-K1647
- **Owned by:** Crescent Harbor Ranch Oak Harbor WA

- **Fullblood**
- **Color:** 100% Black
- **CHS 99%**
- **5 Units**
- **Stored at Hawkeye Breeders Adel IA - shipping is the buyer’s responsibility**

In 1976 there was two black Wagyu bulls imported from Japan; Mazda and MT Fuji. MT Fuji originated from the Hyogo Prefecture and is heavy breeding from the Tajima line. MT Fuji was the beginning of forming the Wagyu herd in the United States as we know it today. Semen on this bull is rare and hard to find. This is an opportunity to incorporate original bloodlines into your program!

### MFC Michiyoshi 522C
- **Lot 78**
- **DOB:** 03/19/2015
- **TATE:** MFC 222
- **Owned by:** Wagyu 100 Mineola TX

- **Fullblood**
- **Color:** 100% Black
- **10 Units - EU Qualified for export**
- **Stored at Hawkeye Breeders Adel IA - shipping is the buyer’s responsibility**

MFC Michiyoshi 522C is the only DNA Verified SCD AA-10 son of the late Michiyoshi. Michiyoshi the sire of MFC Michiyoshi 522C was the #1 ranked bull free from genetic disorder in the 2014 AWA Wagyu Bull Trials. His semen sold for $1,000 per unit at the 2017 Denver Wagyu auction. MFC Michiyoshi 522C is well on his way to exceed his sire bringing not only a higher SCD score of AA-10 but also a drastic increase in size.

### TBR Yasukaneko 1074X
- **Lot 79**
- **DOB:** 10/24/2010
- **TATE:** 1074X
- **Owned by:** Wagyu 100 Mineola TX

- **Fullblood**
- **Color:** 100% Black
- **10 Units**
- **Stored at Trans Ova Centerville TX - shipping is the buyer’s responsibility**

TBR Yasukaneko 1074X is your opportunity to bring an SCD AA-10 Bull into your genetics. A son to Fukutsuru 068 the number one ranked bull in the US Sire summary. The Dam in this mating is the daughter of Sanjirou. Semen is an opportunity to incorporate original bloodlines into your program!
