December 16<sup>th</sup> was a day for the history books in Cowtown (Fort Worth, Texas). The Celina Cattle Company Fullblood Wagyu Production Sale was the first Wagyu Production sale in the state of Texas. With Texas being the home of the most Wagyu breeders in the country in one state, this in itself was a feat. This set the tone to again make this sale a historical day as the lot 13 who started the sale sold for a record breaking \$59,000; the highest selling Wagyu female to sell in open auction within the United States. The crowd was large and very active and in the end, lots sold to nine different states and South Africa. Our hosts served up the great A bar N Wagyu meat products both Friday evening and Saturday before the auction; an amazing product produced by superb people with superior cattle.
