This year's Vermont Wagyu production sale was held at the VT Wagyu farm and headquarters. A 100+ year old barn was our sale site and a beautiful venue for the event. Outside the landscape was painted with the famous Vermont fall foliage and the weather cooperated as we were blessed with a beautiful fall day with just a hint of cold. Every seat was filled and the online audience was also very large with just under 40 registered buyers and over one hundred of viewers. The sale was solid as can be and the VT Wagyu genetics shined as you can see by the averages. Some added lots were a highlight including a week old Itoshigenami embryo calf that stole people's hearts and who commanded \$3,800. Always excitement at this event and we look forward to visiting the farm again in 2021 for the 3rd edition VT Wagyu production sale October 23, 2021.
