Many of the Best
ANGUS, BRANGUS & SHORTHORN BULLS
Raised in California

CALIFORNIA
Breeders Bull Sale
Saturday, October 10th, 2015
12:30 P.M.
Turlock Livestock Auction Yard
Turlock, California
**General Information**

**Accommodations:**
- Holiday Inn Express, Turlock • 209/664-9999
- Best Western Orchard Inn, 5025 N. Golden State Blvd., Turlock • 209/667-2827
- The Gardens Inn, 1119 Pedros Road, Turlock • 209/634-9351
- Travelodge, 200 W. Glenwood Ave., Turlock • 209/668-3400

**Sale Location:**
Directions from Highway 99: Take the Lander Avenue Exit and travel south to the Turlock Livestock Auction Yard, located at the corner of Lander and Fowler streets in Turlock (Approximately 4 miles from Hwy 99).

**Livestock Mortality Insurance:**
Mortality Insurance on your purchases will be available through American Live Stock Insurance Co. at time of settlement.

**Transportation:**
Planes will be met at Sacramento, Oakland or Fresno airports. Contact us as early as possible to arrange transportation.

**Delivery:**
Consignors will try to assist with the delivery of bulls. Please ask in the office for help regarding the delivery of bulls. All bulls must be removed from the Turlock Livestock Auction Yard by 8 p.m. Sunday, October 11th.

**Inspection of Cattle:**
The bulls will be at the sale site from Thursday, October 8th through Saturday, October 10, 2015.

**Health:**
All bulls will be semen and trich tested, and they will also receive a testicular measurement within 45 days of the sale. Anaplasmosis has been recommended to consignors and is noted in the Catalog.

**Grading and Sifting:**
The grading and sifting will be done by an accredited veterinarian and prominent individuals from the industry. Bulls will be graded using the CBCIA system. Sale order will be made from oldest to youngest within grade and division. A Champion and Reserve Champion will be selected from each Angus division with a Supreme Champion Bull being selected from the three division champions. A Grand & Reserve Grand Champion will be selected in the All Other Breed division.

**Lot Numbers:**
Bulls will be ear-tagged with lot numbers in accordance with the catalog.

**Updated EPDs:**
As EPDs are updated every Friday by the American Angus Association, the EPDs in the catalog may vary slightly due to the time between the catalog being produced and sale day. To check the most current EPDs after the catalog is online or printed, please visit www.angus.org

**Performance Data:**
Updated EPD information will be in the catalog from the American Angus Assn. Carcass and ultrasound information is included in the catalog if it is available.

**AM - NH - CA - DD Status:**
All Angus cattle that are selling are AM, NH & CA free. All Angus Cattle are DD free unless otherwise stated in the catalog.

**Lunch:**
Lunch will be available at the sale yard.

**Sale Day Phones**

Sale starts Saturday morning,
October 10 • 9:00 AM

---

**Contact Max Olvera for more details**
(209) 277-2063
TERMS AND CONDITIONS
Any changes in the sale Catalog will be announced from the sales block, and such announcements shall take precedence.
Each animal will be sold to the highest bidder. The auctioneer in charge will settle any disputes as to bids and his decision on such matters shall be final.
Each animal will be at purchaser’s risk as soon as sold. A certificate of registry and transfer will be furnished for the purchaser for each animal sold.
Settlement is to be made by cash or bankable check unless prior arrangements have been made with the sale management.
Breeder’s Guarantee: All bulls will sell as guaranteed breeders. Any buyer suspecting a bull to be a non-breeder must notify the seller within six months of the sale and a licensed veterinarian will determine if that bull is a non-breeder. Upon non-breeder determination, the seller will have the option of paying the buyer the difference between slaughter value and purchase price, or may return purchase price to the buyer and take the bull back. Seller may agree to replace the bull with another of equal value if the buyer agrees to settle in this manner. The above guarantees and terms of the sale shall constitute a contract between the buyer and seller of each lot and shall be equally binding upon both.
All persons attending this sale do so at their own risk. The sales management nor any other person connected with the management of this sale, does not assume liability for the safety of the building or premises or for the behavior of the animals.

GROWTH AND MATERNAL EVALUATION
Expected progeny difference (EPD) is the estimate of how future progeny of each sire are expected to perform in each of the traits listed. EPD is expressed in pounds, either plus or minus. Weaning weight direct (WW) is expressed in pounds, is a predictor of a sire’s ability to transmit weaning growth to his progeny. Weaning weight maternal (MILK) is a predictor of a sire’s genetic merit for milk and mothering ability as expressed in his daughters, or, in other words, that part of a weaning weight attributed to milk and mothering ability.

CARCASS EVALUATION
Marbling EPD (MARB.) is an expression, as a fraction, of the differences in a subjective USDA marbling score of a sire’s progeny at a given end point.
Ribeye area EPD (RIB.) expressed in square inches, is a predictor of the differences in rib eye area of a sire’s progeny, between the 12th and 13th ribs, at a given end point.

ANGUS CATALOG DATA & DIVISIONS
EPD data on all bulls are the Fall 2015 Report. Birth, 205-day and 365-day weights were supplied (if available) by the consignor. • The criteria to qualify for the Low Birth EPD Division is the individual must have a raw birth weight of 85 lbs. or less, and a BEPD of +1.5 or less. • The Carcass Division criteria for qualification is a Marbling EPD of +.40 or higher, a Ribeye EPD of +.30 or higher. • All Angus bulls who do not qualify to either the Low Birth EPD or, Carcass Division will be in the Growth Division.

The Brangus breed was developed to utilize the superior traits of Angus and Brahman cattle. Their genetics are stabilized at 3/8 Brahman and 5/8 Angus. The Brahman, through rigorous natural selection, developed longevity, disease resistance and overall hardiness unmatched by any breed.

As of 9/10/15
The Shorthorn breed of cattle originated in the North East of England in the late 18th century. The breed was developed as dual purpose, suitable for both dairy and beef production; however there were always certain blood lines within the breed which emphasised one quality or the other. Over time these different lines diverged and by the second half of the 20th century two separate breeds had developed - the Beef Shorthorn, and the Dairy Shorthorn. All Shorthorn cattle are coloured red, white or roan, although roan cattle are preferred by some, and completely white animals are not common. However, one type of Shorthorn has been bred to be consistently white – the Whitebred Shorthorn, which was developed to cross with black Galloway cattle to produce a popular blue roan cross-breed, the Blue Grey. - Wikipedia
